PREFACE

The Research and Statistics Branch compiles and publishes the Labor Market Information (LMI) Directory. The branch provides labor market and workforce information as mandated by the cooperative agreement between the Commonwealth of Kentucky, the United States Bureau of Labor Statistics and the Employment and Training Administration. Other authorities include the Workforce Investment Act and the State Division of Unemployment Insurance.

Labor market and workforce information is used in policymaking, planning, program administration, and as a direct consumer service. It is the collection and analysis of data involving labor supply and demand.

The Research and Statistics Branch disseminates a wide range of demographic, labor force, economic, social and other pertinent data and information to various segments of the general public. Employment specialists, employers, employees, educators, counselors, trainers, students and planners are among the most prevalent users of the data and information.

The directory covers the output activity of the Labor Market Information Section and the Employment and Wages Section. It also includes data published by the Branch Manager's office.

The LMI directory's format consists of brief program descriptions, a listing and highlights of available publications and reports, a contact person and an Internet address, if applicable.

LABOR MARKET INFORMATION SECTION

The Labor Market Information Section is comprised of the Local Area Unemployment Statistics (LAUS) program, the Occupational Employment Statistics (OES) program, the Mass Layoff Statistics (MLS) program and the Workforce Information Core Products and Services program. This section collects and compiles a wide range of unemployment statistics and the occupational, economic, demographic and social indicators of the state and the administrative sub-state areas.

Local Area Unemployment Statistics (LAUS)

The LAUS staff develops monthly and annual estimates of civilian labor force, employment, unemployment and unemployment rates. The LAUS data is based on the Current Population Survey (CPS), administrative data from the Unemployment Insurance System and employment estimates from the Current Employment Statistics (CES) and Quarterly Census of Employment and Wages (QCEW) programs. The labor force statistics are revised monthly and annually.

The LAUS program produces the following statistics:

LABOR FORCE ESTIMATES

- Monthly Civilian Labor Force (CLF) estimates, which include civilian labor force, employment and unemployment numbers, as well as unemployment rates, for statewide, all counties, and Metropolitan Statistical Areas.
- Annual average CLF estimates (from 1970 to current) are also available.
- The above referenced CLF estimates can be accessed at the Internet address below.
- CLF estimates are also available for the following sub-state areas:
 - Workforce Investment Areas (WIAs)
 - Area Development Districts (ADDs)
 - Office of Employment and Training Local Offices
 - Congressional Districts
 - Metropolitan Statistical Areas (MSAs)
- The Education Cabinet, Office of Communications, releases updated CLF estimates monthly.

Occupational Employment Statistics (OES)

The Occupational Employment Statistics (OES) program conducts semi-annual surveys of establishments to determine statewide and area occupational employment and wage distribution. The areas include Area Development Districts (ADDs) and Workforce Investment Areas (WIAs). Distributions are also available at the North American Industrial Classification System (NAICS) Sector Level.

KENTUCKY AND AREA OCCUPATIONAL WAGE DATA

- Current occupational employment and wage estimates for the state, fourteen ADDs, and eleven WIAs are available on the website listed below. The complete list of these estimates is also available upon request.
- The following estimates are available for over 700 occupations: Estimated Employment, Relative Standard Error of the Employment Estimate, Percent reporting Occupation, Entry Wage, Mean Wage, Median Wage, 25th Percentile Wage, 75th Percentile Wage, 90th Percentile Wage, Alien Labor Certification (ALC) Entry Wage, ALC Experienced Wage, and Relative Standard Error of the Wage Estimate.
- Occupational wage data by NAICS sector is available and also accessible on the website.
- Additional wage information may be available upon request.

FOREIGN LABOR CERTIFICATION

- Wage estimates from the Occupational Employment Statistics survey are used to certify wages for applications for the Foreign Labor Certification Program.
- These occupational wage estimates produce prevailing wages for alien applicants.

Fax: 502-564-7459

Mass Layoff Statistics (MLS)

The Mass Layoff Statistics (MLS) program collects reports on mass layoff actions that result in workers being separated from their jobs. Monthly mass layoff numbers are from establishments which have at least 50 initial claims for unemployment insurance (UI) filed against them during a 5-week period. Extended mass layoff numbers (issued quarterly) are from a subset of such establishments where private sector non-farm employers indicate that 50 or more workers were separated from their jobs for at least 31 days.

MASS LAYOFF DATA

- The total number of layoffs statewide is available on a monthly, quarterly and annual basis.
- The total number of statewide initial unemployment insurance claims filed during the layoff events is available on a monthly, quarterly and annual basis.

Workforce Information Core Products and Services Program

The Workforce Information Core Products and Services program researches, analyzes and compiles labor market statistics and information, develops Kentucky's American Labor Market Information Statistics (ALMIS), publishes labor market information on the Internet and/or in printed form. The labor market and workforce information covers Kentucky Workforce Investment Areas, Metropolitan Statistical Areas, Area Development Districts and the Office of Employment and Training local office areas. The labor market information is published monthly, annually or in biannual publications.

The publications' formats are both narrative and tabular. The Workforce Information Core Products and Services program obtains data and information from the Kentucky Office of Employment and Training, the U.S. Department of Labor and the Kentucky State Data Center.

LOCAL EMPLOYMENT DYNAMICS (LED)

The Local Employment Dynamics (LED) program is a partnership between the Kentucky Research and Statistics Branch (Office of Employment and Training) and the U.S. Census Bureau. It provides innovative demographic employment information called Quarterly Workforce Indicators (QWI) for Kentucky, its 120 counties, the 10 Workforce Investment Areas and 7 metropolitan areas. Just as national economic indicators measure the performance of the overall economy, the QWI are a set of economic indicators that can be queried in various ways to measure the performance of the local economy.

QUARTERLY WORKFORCE INDICATORS (QWI)

Quarterly Workforce Indicator data available include:

- Total employment
- Net job flows
- Job creation
- New hires
- Separations
- Turnover rate
- Average monthly earnings for all workers
- Average monthly earnings for new hires

For each of the above eight categories, the following criteria can be selected:

- Year and Quarter (1st Quarter 2001 to current)
- Sex
- Age group (nine choices)
- Geographic grouping (statewide plus three additional choices)
- Industry (20 different NAICS supersector levels)
- All employers included vs. only privately owned employers

EMPLOYMENT AND WAGES SECTION

The Employment and Wages Section consists of two programs—the Current Employment Statistics (CES) and the Quarterly Census of Employment and Wages (QCEW).

Quarterly Census of Employment and Wages (QCEW)

The QCEW report is a quarterly compilation by industry and county of employment, wages and contributions data from the employer's contribution reports submitted to states by those employers subject to state unemployment insurance laws. These employers include private corporate and non-corporate entities and all levels of government.

The data generated by the report are needed for trigger determinations under the federal-state extended benefits program; workload forecasting and budget estimates; solvency and experience rating studies of unemployment compensation; sampling frames for the Bureau of Labor Statistics establishment surveys; for personal income estimates by county and used by business and research organizations.

The following are publications generated from the QCEW program:

Current Employment Statistics (CES)

The Current Employment Statistics (CES) program generates non-agricultural employment data for Kentucky and the Bowling Green, Elizabethtown, Lexington, Louisville and Owensboro MSAs. The program calculates manufacturing hours and earnings data for Kentucky and the Louisville and Lexington MSAs. CES estimates are based on a sample survey that is linked to the Quarterly Census of Employment and Wages (QCEW) report and benchmarked every year to the March employment levels.

The CES program produces the following reports:
